Oakland University's Professional and Continuing Education program and School of Engineering and Computer Science are partnering to offer a one-week SAT Preparation Camp.

Utilizing industry-leader Kaplan Test Prep's "Prepare-Practice-Perform" curriculum, the camp provides a research-based, comprehensive approach to helping students prepare for the SAT. Expert instructors who are familiar with the ins and outs of the SAT will ensure that students receive the practice and attention they need to brush up on the test's core content and improve their test-taking skills.

The program is perfect for students considering taking the SAT in the fall, or for those looking to get an early start on their prep for the statewide April 2020 exam.

The following resources are included:

- Review of the key content, test-taking skills, and strategies
- Two full-length practice tests
- Course book
- Online study tool

Instructional sessions will emphasize critical thinking, close reading, problem solving and data analysis skills.

**Dates:** Monday, July 15 – Friday, July 19  
**Times:** 8 a.m.- 3 p.m. (Includes one hour break for lunch, which will be provided)  
**Location:** Oakland University Engineering Center  
**Cost:** $395 (special price for summer)

Register at the PACE website. Click the black “Register” button and type “SAT” in the search bar.
